Subject: documents for TWG

Randy: Attached are the two documents for the TWG: the updated strategic plan document, and the comments and responses table from their December meeting. You might want to remind them of a few things:

1. The shading on the SP doc marks where they indicated at their December meeting that they liked that MO the way it was.
2. Redlined changes are since they saw the document in December. They saw a partially updated version in January.
3. Language approved by the AMWG is included, but not redlined.
4. On the comments and response table, they saw a version in January that had responses to only comments 1-57. Now, all the comments have been responded to, and some comments have been added (Gary Burton's).

You may also want to remind them that they have already addressed goals 1-5 and 7, so except for some changes that AMWG members recommended, and that the AHC agreed to, they shouldn't need to go back. Those changes were: Addition of a phrase to Goal 2, addition of two words to the qualitative target for 4.1, and change of a few words in the qualitative targets for 7.1 and 7.2.

I don't have the benefit of a printer here, so you might want to see how it looks when it's printed. Also, the page numbers sometimes get weird -- it will say "page 14 of 1," or something. So check for that before printing.

Let me know if you have any comments or questions. If you need to reach me tomorrow, you should call rather than use email. MO
